Is THE board of health has the power to require physicians to report their cases of rellow-fever, the authority ought to be asphysicians who ignore the existence of the board of health. This neglect of a simple duty may be regarded as independence by the doctors, but it certainly is not by the people. The health office should be the complete that there are a few here to put their wild plans or theories into practice. Denver Republican: "There was a little happening at the Grand Central hotel on Saturday morning, which was not down on the billis, and which the Sunday morning papers utterly falled to discover. The trouble was of a nature not often indulged in in this city by men of standing—it was a fist fight—a common knock down. It appears that during the congressional investigations in Washington last winter, Colonel Curry, of Arkansas, gave some evidence incidentally, with reference to mail contracts in which Senator borse of the same State contracts in which Senator borse of the same State contracts in which Senator borse of the same State in the mines there in company with some other gentlemen. Soon after the ex-senator also came to Leadville, and it is stated, seeling his old enemy heavily interested, went to Curry's partners and warned them to beware of Curry and also, it is said, talked in the same manner about town. This entraged Curry evil much, as it came to his ears soon atterward, and he sought Interviews frequently with the city of the interview and was followed closely by the Infuriated Coionel Curry. It is stated that an interview was demanded by him here, and that it, as had been former efforts of the same nature, had been utterly refused. Then came the finade. Mr. Mortified Dahlgren. New York Star: "Mr. Mortimer Dahl-New York Star: "Mr. Mortimer Dablgren, who appears to have settled himself upon the estate of his sister, Mrs. Dorsey, of Mississippi, with the intention of becoming her helr, is naturally very much disgusted because she devised the property he coveted to Hon. Jefferson Davis. The story which he tells is therefore to be taken with many grains of allowance. His fitness for the task of an historian of the domestic situation at Beauvoir may be judged by the insulting character of his altusions to Mr. Davis and his coarse designation of his sister as a monomaniac. A chronicler who approaches his subject in that temper must not complain if people refuse to agent for the celebrated Amazon bitters, a

credit what he relates. Mr. Dahlgren may be a very much wronged young man, but the evidence goes to show that his wrongs were chiefly self-inflicted. That his sister had a perfect right to do as she pleased with her property does not seem to have occurred to him, and in accusing Mr. Davis of cultivating her friendship with the view of sharing her wealth, he quite overlooks the fact that that was the very thing he was doing himself."

the Crops that Promise an Abandance. casional Correspondent of the Appeal.

Toccapola, Miss., August 7.—I trust that a few dottings from your occasional correspondent may prove interesting to your many feaders. A few days since I bid addeu to old Fayette, bound on a southern tour, and aurived in due time at Mount Pleshant, Mississipal, Rumor and that there were two cases of reliow-lever at Holly Springs. We sped along at a little less than "two forty" speed, On arriving at Holly Springs we were informed that it was a mistake. The att has been burdened with flying reports till we hardly knew how to go or which way to lurn, but I am sorry to say that, it only took a few days to confirm the reports that jellow-fever had actually made its appearance in your city. Arriving at Waterford, we were told that they had the fever in Water Valley, which has since been contradicted. We are still loath to believe that the fever will rage to a great extent in Memphis. A pale of woe seems to have settled over the once gay city. It is said of "whom the gods love they list seek to destroy." Is it to be so with Memphis? What has the done to deserve all this punishment? Within a few years past she has become one of the great commercial centers of the south, but now her prosperity seems to be in jeopardy. Yet be of, good pheer. Memphis, situated as she is on the banks of the Father of Waters is yet to be a city of great renown—far eclipsing the ancient city of old on the Nile. A more hospitable, magnanimous and patriotic people have never had their prestige written higher up in the scroll of ancient or modern times, in no country beneath the broad canopy of heaven. True to the principles that gave her birth; deeply limbued with patriotic principles inherited from a noble ploneer ancestry. Where is the heart that fails to beat in sympathy with the people of the Bullef City? Memphis is so closely interwoven with all the surrounding country that her interests is their interests.

MALARIA

An Antidote which will cure every variety of Ague, Fever and Ague, and Chills and Fever, and leave no bad trace or disorder in the system, has been discovered by one of America's greatest Chemists. This preparation or principle is known by the name of CLIFFORD'S FEBRIFUGE. Being entirely free from minerals or other deleterious materials, it accomplishes its work without being in the least harmful to the system. This popular remedy differs from all other Ague Cures, in being free from all poisonous effects on the system: it enters into the circulation and destroys all malarious poison, and thus eradicates the disease without producing any of those distressing after-sensations, such as fullness and pain in the head, ringing in the ears and partial deafness. It is a question of importance to all afflicted creatures, whetlier they will be cured of disease by reme dies which leave a long train of bad aftereffects, or by a medicine that strikes at the much water. No other preparation known exercises an eradicating power over inter mittent diseases at all comparable with it. It enters the circulation and utterly destroys the germs of poison; it will purify and build up the debilitated system in a shorter time, and with more lasting benefit than any other known remedy. As a Tonic it acts as an Antiscptic and Blood Purifier, bringing renewed energy and vitality to the body worit down by disease: It is Natwe's own remedy for all diseases arising from malarial poison. Palatable, Powerful, Antiperiodic and Tonic, it never falls to cure Fever and Ague, Dumb Chills, Con-

gestive Chills, Bilious Fever, Periodical Nenraigia, and all diseases of malarial origin. The only article known that will eradicate this disease permanently from the system: J. C. Extract from Letter of the U.S. Treasury Department: "In conformity with your request the Secretary of Style was asked to cause a thorough inquiry to be made into the matter by our consulat Cologne, who concludes his report as follows: "I therefore state that he is my opinion, formed after what I consider a careful and painstaking investigation, that the Apollinaris Water, bottled at the Apollinaris Springs, as exported to the United States, is beyond question a Natural Mineral Water. The evicence which accompanies the Consul's dispatch abundantly sustains his conclusion that the Apollinaris Water, as imported, is a Natural Mineral Water."
